Program at-a-glance

8:00 a.m. Registration and Networking Breakfast

8:30 a.m. Urban Wind Turbines - CLEANFIELD ENERGY

This course will focus on the economic, operational, and environmental benefits of vertical axis wind turbines (VAWTs). You will learn about: the technical features and costs of such turbines; how they can reduce building owners' dependence on utility grid electricity and how easily they can be mounted on rooftops of buildings or on poles or integrated into the design of the building, making effective use of under-utilized space.

9:30 a.m. High Performance Dynamic Facades - SUN PROJECT

Well designed, integrated façade systems represent a key opportunity for buildings to significantly reduce energy and deliver maximum daylight and comfort to occupants.

10:30 a.m. BREAK

10:45 a.m. Designing with ICF - AMVIC BUILDING SYSTEMS

This program introduced Insulated Concrete Forms (ICF) as a construction technology as well as highlights the benefits of ICF construction for builders and occupants. By the end of the program, participants will have the information and knowledge required to design with ICFs.
